

SaSI 2002 Summary Tables

Table 1 below is a state-wide summary of the numbers and percentages of healthy, depressed, critical, extinct and not rated stocks and stocks of unknown origin 1992 and 2002 by species. Table 2 presents the same information but organized by region (Puget Sound, Coast and Columbia River). Tables 3, 4 and 5 present stock status in 1992 and 2002, stock origin and production type by region and river basin. Tables 6 through 11 organize the same information as in tables 3 through 5 by species. Tables 12 through 23 present Endangered Species Act (ESA) listing status, SaSI stock status, stock origin and production type for evolutionarily significant units (ESU's) that have been listed as threatened or endangered under the federal Endangered Species Act.

Table 1. STOCK STATUS SUMMARY BY SPECIES – 1992 AND 2002

Salmon and steelhead stocks	1992		2002	
	No. of stocks	Percent of stocks	No. of stocks	Percent of stocks
Total stocks	435		441	
Healthy stocks	187	43%	163	37%
Depressed stocks	122	28%	110	25%
Critical stocks	12	3%	21	5%
Extinct stocks	1	<1%	9	2%
Not Rated stocks	Not applicable		2	<1%
Stocks of Unknown status	113	26%	136	31%
Chinook stocks	108		105	
Healthy	54	50%	37	35%
